

When Nikki and I took this same test years ago, we realized that we needed to do something in addition to having a job....

A friend referred an author, Robert Kiyosaki who wrote a book titled, "**Rich Dad, Poor Dad**". WOW! It changed everything about what I thought about making and earning money.

Robert Kiosaki discusses The Perfect Business **and how to create** Streams of INCOME.

Is this Network Marketing? YES!! And that is exactly what you want it to be. Network Marketing – with the RIGHT company – is what Robert Kiyosaki calls the “Perfect Business”.

Why is he so appreciative? Because he says Network Marketing is practically the only way that regular people (those not comfortable going a million dollars in DEBT like he did) can establish residual income, otherwise called “Continual Cash Flow”.

- *Imagine* earning substantial income fast – while working just part-time
- *Imagine* having time to spend with family, friends, on travel or just plain fun without financial worries.
- *Imagine* not having to worry about how you will retire.
- *Imagine* having your own business while working with a respected international company that is helping people all over the world.
- *Imagine* working with people like and respect who train and mentor you.
- *Imagine* improving your own health and appearance and that of your family.

In his book, he teaches us how we all need to move from being an EMPLOYEE or SELF-EMPLOYED to a BUSINESS OWNER and INVESTOR.

The most common ways to become a BUSINESS OWNER has been building your own business (Like Bill Gates) or buying into a Franchise. **The 3rd Option is Network Marketing!**

If you are like me, I never even thought Network Marketing was something that I was interested in...

But, my research proved to me that I found a way to move to the BUSINESS OWNER without buying a Franchise, or borrowing hundred of thousands of dollars to start my own business.
